

ELEVATOR WALLS AND FLOORS

ELEVATOR WALLS AND FLOORS ARE IDEAL APPLICATIONS FOR BELLCOMB STRATA PANELS.

BENEFITS INCLUDE:

LONG LASTING BEAUTY

Stone lasts and looks great forever.

EASY MAINTENANCE

No painting or replacing every few years.

EASY AND FAST TO INSTALL

Strata Panels™ can be installed in minimal time with minimal elevator downtime.

ELIMINATE COSTLY AND TIME CONSUMING FLOOR BUILDUP

Strata floor panels eliminate the necessity of a typical multiple step, tile floor buildup: plywood, wet mortar and tile. Strata Panels™ can be simply glued to the floor.

THINNER

Makes floor transitioning easier.

STRONGER

More impact resistant than traditional floors and walls.

LIGHTER

Up to 80% lighter than tile floors.

SAVE ENERGY

Strata Panels™ are significantly lighter resulting in substantial energy savings.

DURABLE

Real stone has much longer life than wood and vinyl paneled elevators.

COMPETITIVE COST

Installed costs are comparable and often lower than traditional tile floor.

LOTS OF DESIGN OPTIONS

Strata Panels™ are available in twelve standard stone colors as well as a virtually unlimited selection of custom ordered stones.

ABOUT BELLCOMB

Bellcomb has been manufacturing honeycomb panels for a multitude of applications since 1989. All Bellcomb honeycomb panels are built using aerospace composite and bonding technology in the largest honeycomb panel capacity manufacturing plant in the world.
