### FOR IMMEDIATE RELEASE

#### **Bellcomb Achieves DNV/IMO Certification on its Nautical Lite™ Marine Panels**

Minneapolis MN June 8, 2011- Bellcomb Technologies, a leading manufacturer of innovative lightweight panels and panel system solutions, has submitted for and passed DNV/IMO certification requirements on its Nautical Lite™ Marine Panels.

Receipt of the certification for DNV MED-B6521/D1422 allows Bellcomb to expand its Marine Panel offering and provide a broader range of solutions to the workboat, military and cruise shipping industries. "We are excited to be able to supply quality certified Nautical Lite™ Marine Panels to our clients. Our team is focused on providing solutions to our clients in all markets and the hard work and dedication of our employees pays off with successes such as this." States David Hartwell, President.

Bellcomb Technologies provides both custom design lightweight panel solutions as well as market focused solutions including marine panels, barricades, transportation solutions and cleanroom systems. The company continues to drive toward excellence for its clients through product development, new market solutions and superior client care.
